

## **Appointed Person (Lifting Operations) Crane Supervisor (Lifting Operations)**

The Federation of Piling Specialists considers that the CPCS cards for Appointed Person (Lifting Operations) and Crane Supervisor (Lifting Operations) are not appropriate for piling operations.

The Federation supports the objective of a fully qualified and registered work force. In addition to passing the CPCS health and safety course, site operatives should have received appropriate and up to date safety awareness training in accordance with the FPS guidelines, and should hold a CSCS or CPCS card appropriate to their main activities. Personnel undertaking appointed person and crane supervisor duties should have successfully completed a two day (or longer) training course.
