Crane Mounted Piling Rigs

Appropriate CPCS Cards

Piling equipment mounted onto crane machines (ie piling equipment being attached to a crane):
The operator shall have a crane operator's CPCS card as well as the card for a Piling Rig Operator as the machine is primarily a crane.

Piling equipment fitted to base machines: The base machine being used is set up for piling with a fitted piling mast. This determines the primary use, not the machine it is mounted onto. Therefore the operator will need only a Piling Rig Operator CPCS card as the machine cannot operate as an excavator, etc.
