

Safe Use Of Telescopic Handlers

Always Ensure:

- The machine is in a safe to use and in a serviceable condition
- Always travel with the boom fully retracted low to the ground
- Ensure you FULLY understand the Duties Charts and Load Centres
- Ensure RAMS/Lift Plans are in place and Followed
- Ensure the ground conditions are safe before lowering stabilisers
- Ensure load moment indicators are fully working
- Ensure the working platform is suitable and sufficient for the tyre/stabiliser loadings

Never:

- Travel with a raised boom
- Under sling Loads from the forks
- Turn across slopes
- Pick and carry with suspended loads (AP must do a lift plan)
- Exceed the duties charts
- Lift people
