

# Vibroflotation

- Rig operators must make sure that they have all round vision by mirrors/cctv. If not you must have a banksman.
- Once you have tracked to probe position put ALL the legs down.
- Do one thing at a time.
- Never leave the stone skip suspended once the stone has been discharged.
- Keep the carriage slides well greased.
- Ensure that leaders and vibrator are plumb.
- Do not tamper with electrics. Get a qualified electrician to attend to problems.
- Shovel loaders should have rear view mirrors and flashing beacons.
- The tyre pressures of the shovel loader are critical. Check them regularly.
- Use shovel loaders only to carry loads in the bucket. They must not be used for any other lifting jobs.
