## DESIGN ENGINEER – GRADUATE / ENTRY LEVEL

Piledesigns Ltd is a privately owned geotechnical consultancy based in High Wycombe, Buckinghamshire. We are seeking an entry level design engineer who is looking to advance their career in geotechnical design. The role would suit a graduate level candidate or someone with limited experience within the geotechnical / construction industry.

Working within an experienced team you will be accountable for producing a wide range of geotechnical designs in line with industry / company best practice standards. You will develop the skills to combine a sound technical understanding with practical buildable solutions for a range of clients across the UK.

### Qualifications & Skills

- Degree in Civil Engineering / Engineering  
Geology preferable but not essential
- Good communication both written and verbal
- Confident with MS Office
- Desire to learn and develop

### Benefits

- Friendly working environment
- Competitive Salary & Annual leave allowance
- Pension contribution
- Flexible Working

The role would suit someone wishing to develop their career within geotechnical industry and may include a person without explicit pile design experience. For initial consideration please send a CV to [enquiries@piledesigns.co.uk](mailto:enquiries@piledesigns.co.uk)
